# Security organization worksheet

| Part 1: Describe your security interests |
| --- |
| <ul><li>Securing digital devices</li><li>Reducing the attack surface (Security Hardening)</li><li>Security Audits</li><li>Pentesting</li><li>Bug Bounty</li></ul> |

| Part 2: Identify three organizations and include their mission or objectives |
| --- |
| <ul><li>**Organization 1: Organization for Economic Co-Operation and Development** https://www.oecd.org/digital/</li><li>**Organization 2: Panda Security** https://www.pandasecurity.com/en/technologies/</li><li>**Organization 3: NCC Group** https://www.nccgroup.com/us/managed-services/bug-bounty-vulnerability-disclosure-services/</li></ul> |

| Part 3: Write out which organization aligns with your interests and why |
| --- |
| <ul><li>**Organization 1:** OECD builds better policies not only in the digital domain but various other domains. It focuses on Digital security which forms the base level of all the attacks.</li><li>**Organization 2:** Panda Security provides solutions for protection against malware, and other threats such as APTs, ransomware, and zero day threats.</li><li>**Organization 3:** NCC Group offers bug bounty service. They also offer Application Penetration testing, and Cyber Security Improvement to help organizations and businesses assess their current security practices against the established cyber security standards.</li></ul> |

- **Best choice for my professional interests:** For now out of these three, I believe NCC Group seems more promising for me because it offers bug bounty services to businesses and organizations and that is what I am interested in the most.

  **NOTE:** As I continue my cybersecurity journey I will update this document after researching and refining my choices and interests.
